**Community Booth:**

**The Strindberg Laboratory** - a nonprofit theater company located in Montrose. Working with people from marginalized communities including those with intellectual disabilities. We have created a global citizen led newspaper that highlights the importance and need for

free public spaces. The print only newspaper has articles from citizen reporters from Montrose, Kenya, South Africa, UK, Ireland, UK and Finland and also has artwork and photos. At the market with some of our actors we will play some fun simply and brief community building games with those that are interested that will lead to hopefully a brief conversation about public spaces and why it's important for us as a community theater and for regular people to meet and discuss important topics. Then, we hope if they like they will enjoy a newspaper so they can share the information they gain from the newspaper with family and friends.
